1. Downloading

- a. Student can download the app from Google Playstore or can get from their site Admin. It depends on how the site admin distribute the application file.

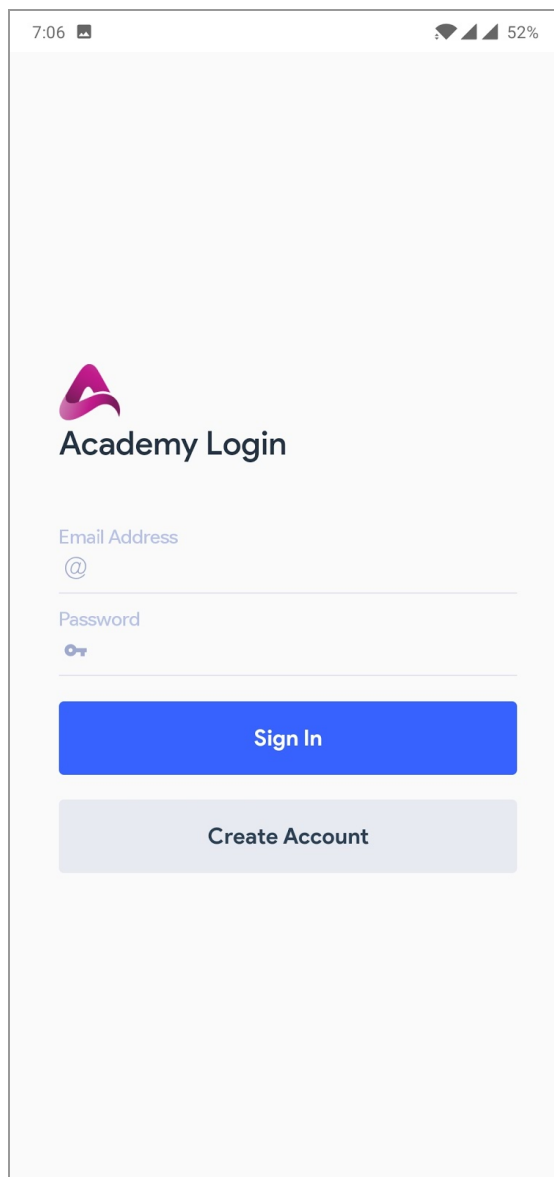

2. Installation

- a. Let's surmise that Student has got the apk file. Now it's time to install it on their smartphone. The apk file should get installed without any issue occurring, unless he/she gets a corrupted apk file. After successful installation open the app.

3. Login

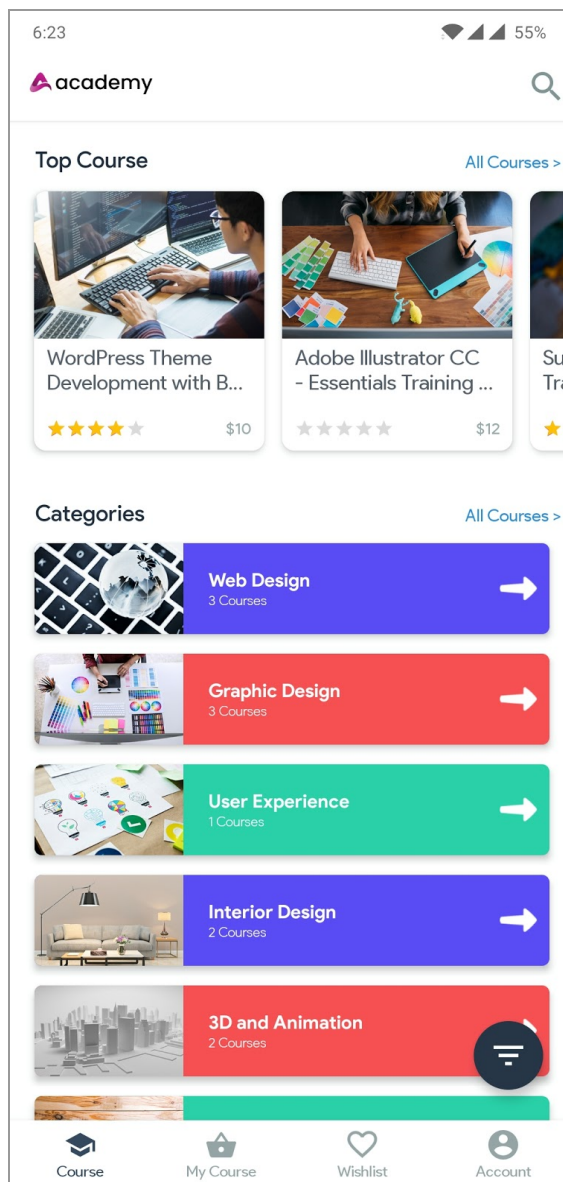

- a. If the application gets installed successfully, students can log in with their valid login credentials which they use for login in to **Academy Web Application**. Student does not need any separate login credentials for mobile application. Make sure that, Student can login into **Academy Student Mobile Application** and Instructor or Admin can login into **Academy Instructor Mobile Application**.

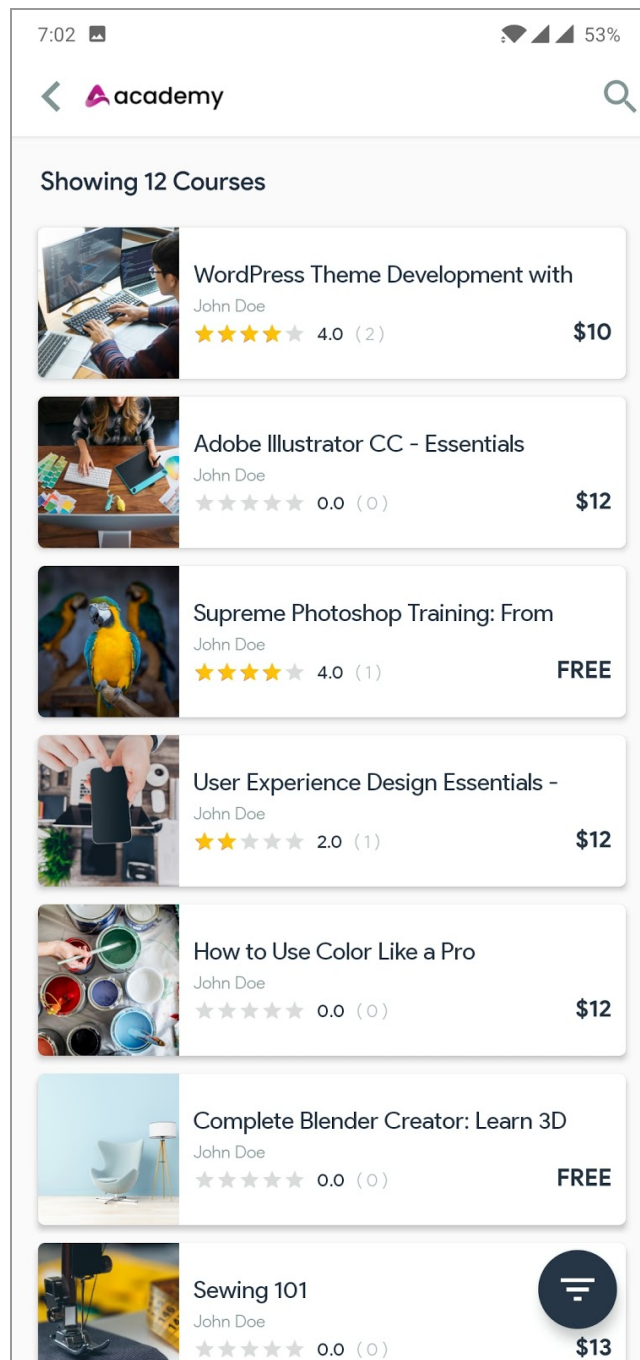

The image shows a mobile application interface for 'Academy Login'. At the top, the status bar displays the time 7:06, signal strength, and 52% battery. The app's logo, a stylized pink 'A', is centered above the title 'Academy Login'. Below the title, there are two input fields: 'Email Address' with an '@' icon and 'Password' with a key icon. A blue 'Sign In' button is positioned below the password field, and a light gray 'Create Account' button is below it.

4. Courses

- a. For browsing courses Student does not need to login. They can browse the Courses and all the Categories on the first page. Just tap to Home icon from Bottom Navigation bar. On the top you will see all the Top courses below that you will find all the categories available on Web application. If you want to check out all courses just click on the blue "All courses" link.

- b. If you want to get a list of courses based on Category you can click on a desired category you want. It will take you to the next page with all the courses related to that selected Category.

- c. There is a floating Filter button on the homepage for finding out the desired course. It will make your journey a way easier.

Reset **Apply**

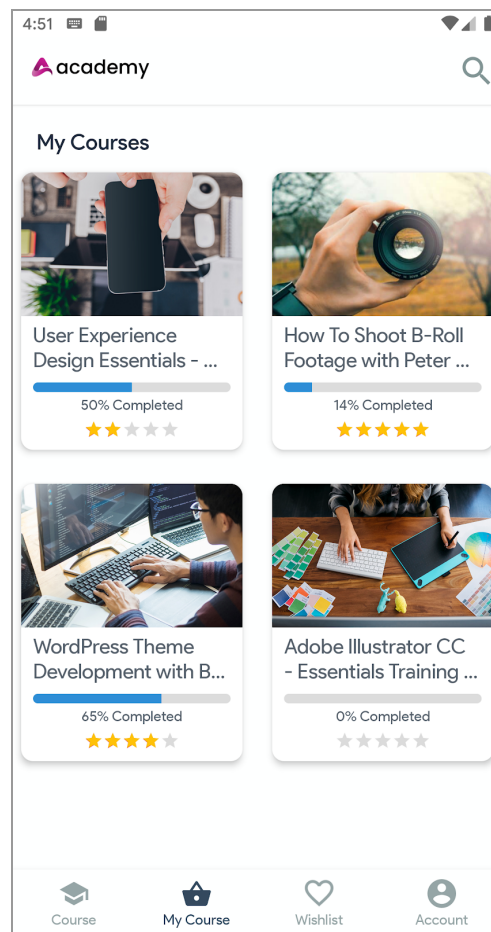

- d. Tapping on a certain Course will take you to the Course Details view page. All the course details like: Course title, how many students got enrolled into that course, rating, total number of ratings, course price,

course preview, which are the prerequisites of this course, what are the outcomes, what are the requirements, course curriculum, course preview and a button for sharing the course. Student can make a course as wishlisted course from here. Just tap on the Wishlist button if you are logged in.

5. My Courses

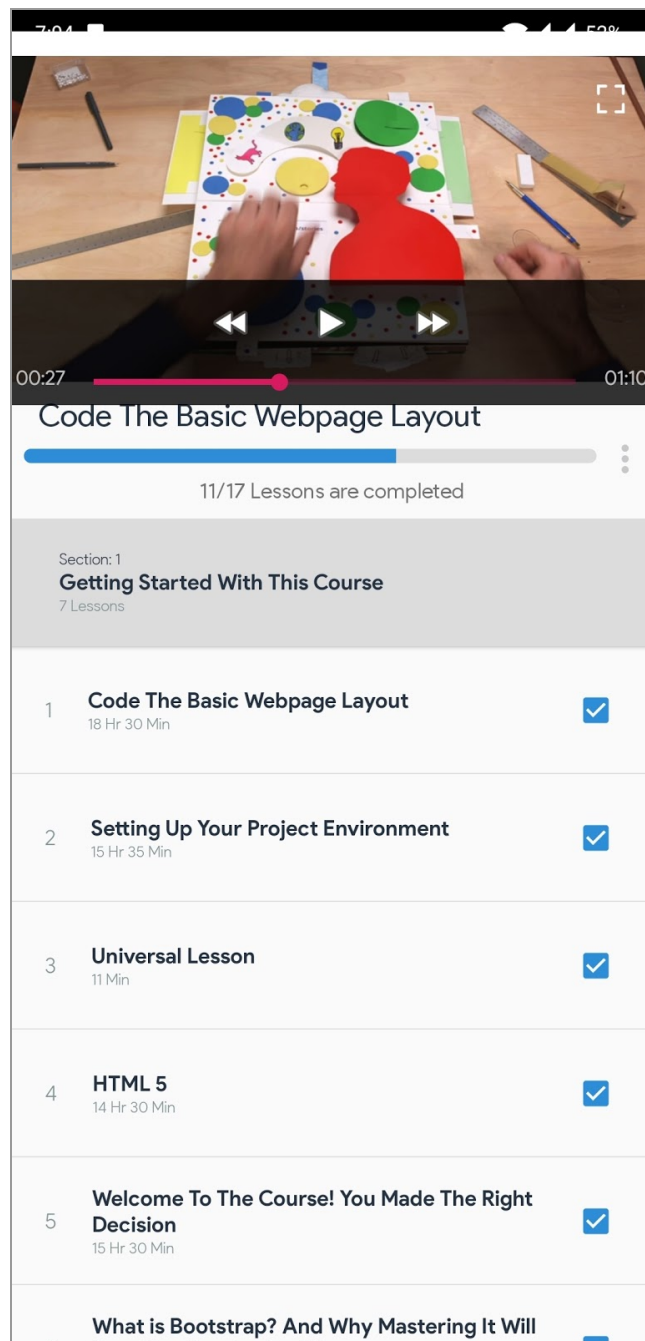

- a. Student will find this option on bottom navigation bar. If aStudent wants to check this option they have to remain logged in state. If they remain logged in, this view page will show all the courses that a student has enrolled in. This view will also show how much the user has completed and the rating for that course.

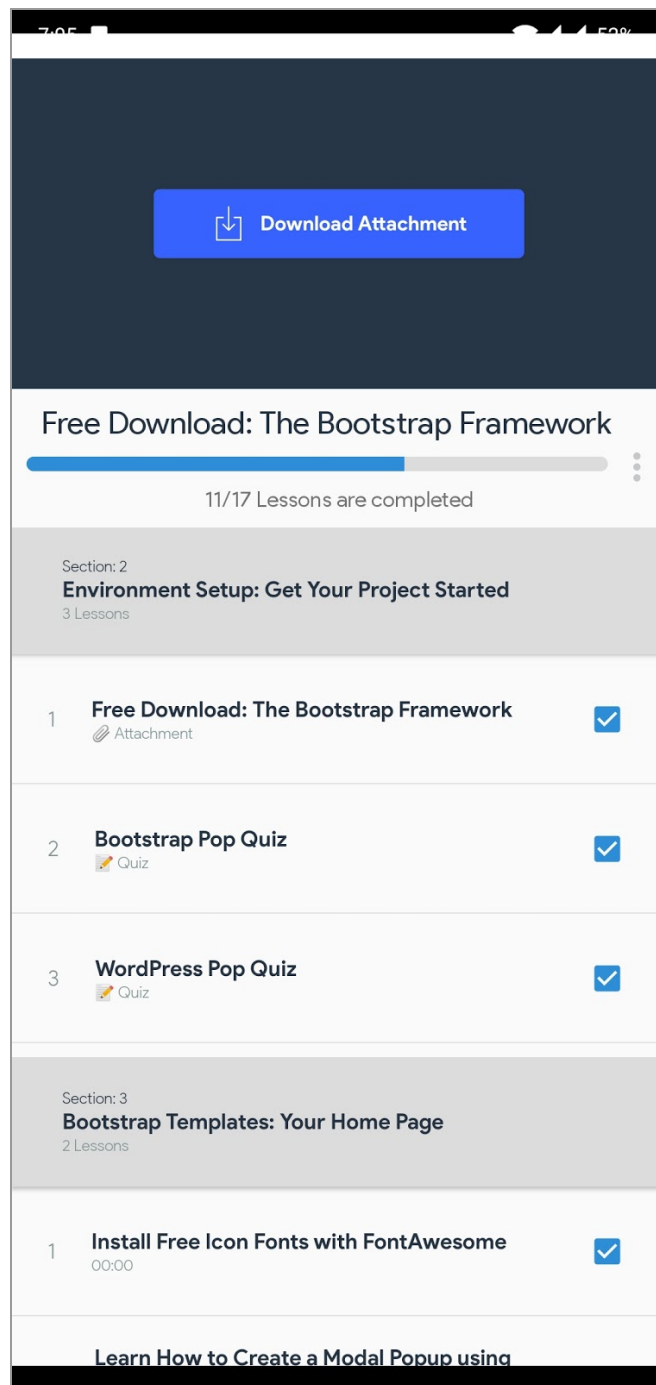

If you want to dive in and access lessons, tap on a course. It will take you to the Lesson playing page. As you already know there are 3 types of lessons available on Academy Web Application.

i. Video Type Lesson:

1. If you tap on a video type lesson, the lesson will play on the top video player section. You will see the playing lesson title there.

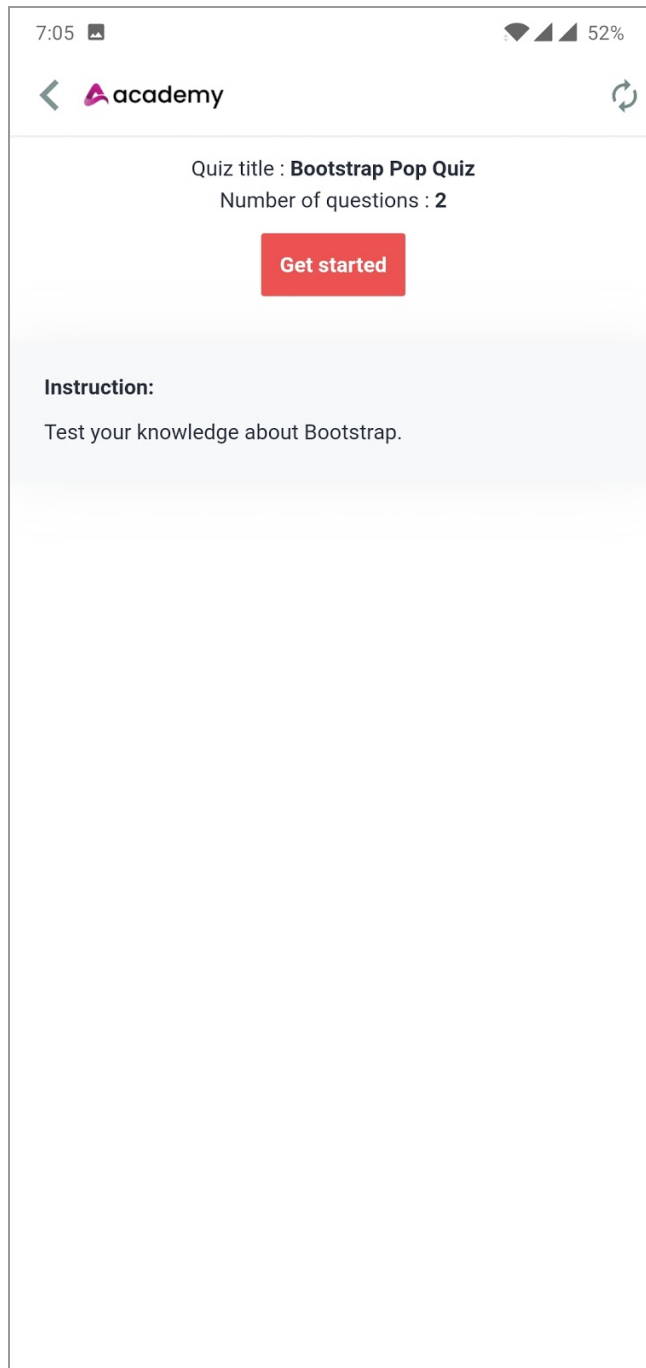

- ii. Attachment Type Lesson:
1. You can download attachments like, doc, pdf, image and other files like what you do on academy web application.

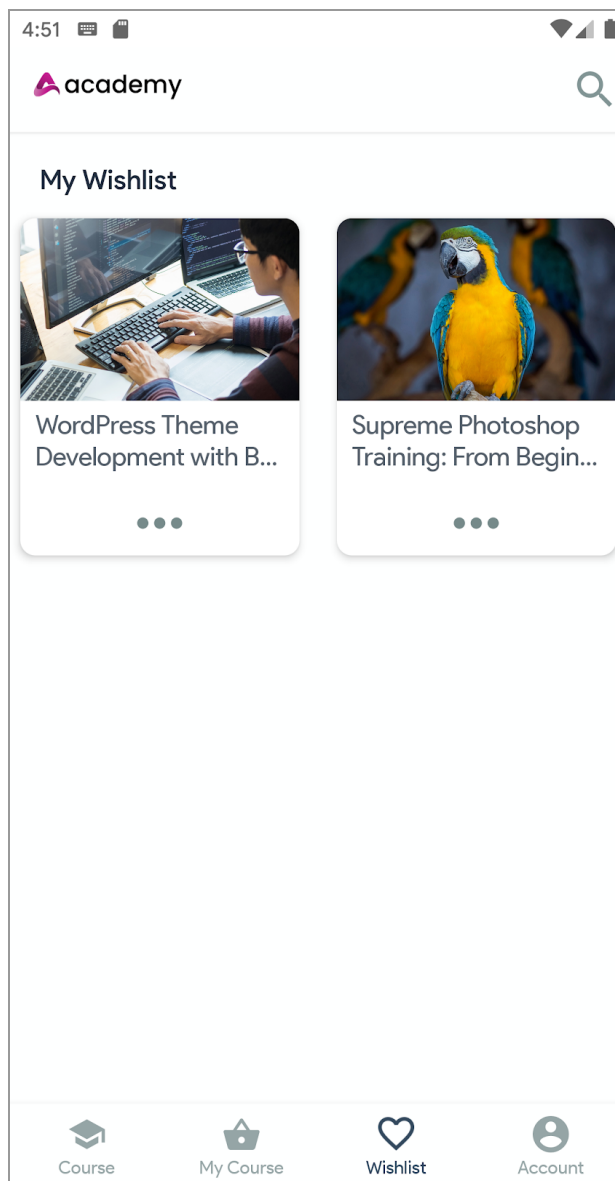

iii. Quiz:

1. If the lesson is quiz, User can access it by simply tapping it.

6. Wishlist

- a. Like My Courses, User has to remain logged in for accessing this view page. This view page will show all the wishlisted course according to logged in user. Tapping on individual course will take to the Course details page. User can remove a course from wishlist items. Tap on the More icon, it will pop a view up for removing an item.

7. Manage Profile

a. Edit Profile Data:

- i. The last option on the bottom navigation bar is Account. Which is all about a user's personal data. User can edit display image, name, email and social media details from here.
